EDUCATION

BS, Mechanical Engineering, National Technical University of Athens, 1995
MS, Engineering Mechanics, Virginia Tech, 1998
PhD, Engineering Mechanics, Virginia Tech, 2000

HONORS-AWARDS-RECOGNITION (PARTIAL LIST)

- 2016, Journal cover Meas Sci Technol. Meas Sci Technol IOP Publishing; 2016 Sep 15;:1–11. “Jun, Brian; Giarra, Matthew; Yang, Haisheng; Main, Russell; Vlachos, Pavlos, Nanoparticle flow velocimetry with image phase correlation for confocal laser scanning microscopy”.
 - 2015, Proceedings of the National Academy of Science, cover and journal highlight “Gart S, Socha JJ, Vlachos PP, Jung S. Dogs lap using acceleration-driven open pumping. Proceedings of the National Academy of Sciences of the United States of America. 2015 Dec 14;:201514842–5.”
 - 2015, University Faculty Fellow, Purdue University
 - Solberg award citation for instruction, voted at the top 10 best instructors by the Purdue School of Mechanical Engineering undergraduate students.
 - 2015, fall semester; 2016, spring semester
 - 2014 Journal of Experimental Biology, Cover and journal highlight, “Holden D, Socha JJ, Cardwell ND, Vlachos PP. Aerodynamics of the flying snake *Chrysopelea paradisi*: how a bluff body cross-sectional shape contributes to gliding performance. 2014 Jan 29;217(3):382–94.
 - 2013 Measurement Science and Technology, Journal Highlights, Raben, S.G., Charonko, JJ, Vlachos, P.P., “Adaptive Gappy Proper Orthogonal Decomposition (POD) for Particle Image Velocimetry (PIV) Data Reconstruction”
 - Outstanding Paper Award, 2013 ASME Global Congress on Nano Engineering for Medicine and Biology, awarded for Cara Buchanan, Elizabeth Voigt, Christopher Szot, Pavlos Vlachos, and Marissa Rylander. Tissue-Engineered Tumor Microvessels to Study Shear Stress-Mediated Angiogenesis. Paper Number NEMB2013-93220. Proceedings of the 2013 ASME Global Congress on Nano Engineering for Medicine and Biology, February 4-6, 2013, Boston, MA, USA.
 - 2012, Robert E. Hord Professor of Mechanical Engineering Dept. College of Engineering, Virginia Tech.
-

-
- 2010, John R. Jones Faculty Fellow, Mechanical Engineering Dept. College of Engineering, Virginia Tech.
 - Moody Award ASME Division of Fluids Engineering 2011, most outstanding technical paper dealing with the practice of fluids engineering
 - 2010 Outstanding Paper Award, Fluid Mechanics, journal of Measurement Science and Technology, Institute of Physics
 - 2009 Outstanding Paper Award, Fluid Mechanics, journal of Measurement Science and Technology, Institute of Physics
 - Dean's Award of Excellence in Research, Virginia Tech 2009-2010
 - Virginia Tech Scholar of the Week, 2010.
 - W. M Reed Lecture, University of Kentucky, April 2008
 - Keynote speaker, Fluids Engineering Summer Meeting 2007, Forum on Fluid Measurement and Instrumentation
 - College of Engineering Faculty Fellow Award 2007
 - Moody Award ASME Division of Fluids Engineering 2007, most outstanding technical paper dealing with the practice of fluids engineering
 - National Academy of Engineering 2006 Frontiers of Engineering Symposium. Nominated and selected attendee. One out of 81 attendees across the nation, across all areas of engineering and academia, government or industry. (Abstract from the news release "*...Frontiers of Engineering attendees — engineers 30 to 45 years of age and representing academia, industry and government — were nominated and selected in recognition of their contributions to the advancement of engineering and their potential as future leaders in their fields...*")
 - NSF CAREER 06 Arterial Flow Dynamics: Effects of Pulsatility Compliance and Curvature
 - MIT 2005 11th Annual T.F. Ogilvie Award, Young Investigator Lectureship in Ocean Engineering and Fluid Mechanics
 - Dean's Award of Excellence for Outstanding Assistant Professor Virginia Tech 2004-2005
 - Dean's List for Teaching Excellence, 2004, 2005
 - Member of Hellenic Academia of Abroad (HELLADIA Organization) May 2000. Recognition to promising or established Greek scientists outside the Greek borders.

MEDIA MENTIONS (PARTIAL LIST)

- (across several outlets): Coalescence of oblique jets ... Engineers Explain Physics of Fluids Some 100 Years After Discovery
- R&D Magazine (and many other outlets): How do animals drink ... Nature's phenomena might teach engineers new tricks
- Related to our paper on flying snake gliding flight in the journal of Biomimetics & Bioinspiration (Socha et al. 2010):
 - Pentagon seeks flying snakes' secret. By Marc Kaufman, The Washington Post, November 22, 2010.
 - Flying snakes' secret revealed. By Stephanie Pappas, Livescience.com, November 22, 2010. Also found at MSNBC.com and foxnews.com, among others.
 - How snakes can fly. By Ker Than, National Geographic Daily News, November 23, 2010.
 - Flying snakes, caught on tape. From the AIP press release (written by Kathy Svitil) on PhysOrg.com, November 23, 2010.

-
- Video reveals how a flying snake slithers through the air. By Jennifer Walsh, Discover magazine 80beats blog, November 23, 2010.
 - NPR All Things Considered. Interview on NPR by Mary Louise Kelly, November 24, 2010.
 - Sakes Alive! Snakes That Fly! By Mark Memmott, NPR “The Two-Way”, November 24, 2010.
 - Daily Planet television segment. November 24, 2010.
 - Video: See snakes fly: Virginia Tech researchers are learning how the reptiles are able to glide so gracefully to the ground. By Jef Akst, The Scientist, November 24, 2010.
 - Flying ophidians! Physicists uncover how snakes soar between trees. By Katherine Harmon, Scientific American online, November 24, 2010.
 - Pentagon wants secret of flying snakes. By Lee Speigel, AolNews, November 24, 2010.
 - it’s a bird. It’s a plane. No, it’s a flying snake. By Sindya Bhanoo, The New York Times, November 29, 2010.
 - Snakes with no #&%\$\$!! plane! CBC Radio program Quirks and Quarks with Bob McDonald, December 4, 2010.
 - The Conversation: Flying snakes? ABC News Video, December 7, 2010.
 - MultiSTEPS (Multi-Scale Transport in Environmental and Physiological Systems) NSF-IGERT program award news releases and announcements across multiple news outlets
 - Feature at NPR “All things considered.” and other radio stations for the work to fight cardiovascular disease.
 - Featured in the Virginia Tech Research Magazine, Article titled: “Engineers seek to stem massive, deadly flow of heart disease”, Aug. 2009
 - Science360 featured the NSF EFRI award, “Complex Microsystem Networks Inspired by Internal Insect Physiology” Article titled: The Secrets of the Lowly Ground Beetle Could Lead to Better Tissue Engineering, Sept 2009.
 - Featured in “NewScientistTech: *Underwater Weapons-the New Wave*” for research in future underwater weapons

PROFESSIONAL AND ACADEMIC APPOINTMENTS

PURDUE UNIVERSITY, WEST LAFAYETTE, IN, AUG. 2013-PRESENT

- 08/13- present : Professor, School of Mechanical Engineering Purdue University
- 08/13- present : Professor, School of Biomedical Engineering Purdue University (by courtesy)
- 08/13- present : Affiliate Professor, Mechanical Engineering Dept. Virginia Tech
- 08/13- present : Affiliate Professor, School of Biomedical Engineering and Sciences Virginia Tech
- 11/06-present : Adjunct Faculty, Wake Forest School of Medicine
- 09/04-present : Affiliate Faculty, Dept of Engineering Sciences and Mechanics, Virginia Tech

VIRGINIA TECH, BLACKSBURG, VA, 2000-2013

- 10/12-08/13 : Robert E. Hord Professor, Mechanical Engineering Dept. Virginia Tech
- 06/11-10/12 : Professor, John R. Jones Faculty Fellow, Mechanical Engineering Dept. Virginia Tech
- 06/07-06/11 : Associate Prof. Mechanical Engineering Dept. Virginia Tech
- 08/03-08/13 : Core Faculty, School of Biomedical Engineering and Sciences, Virginia Tech
- 08/03-06/07 : Assistant Prof. Mechanical Engineering Dept. Virginia Tech
- 01/01-08/03 : Aeroprobe Corp (Blacksburg, Va.) Senior Scientist. R&D (part time).
- 07/02-08/03 : Research Assistant Prof. Eng. Sc. and Mechanics Dept. Virginia Tech (part time)
- 09/00-07/02 : Visiting Assistant Prof. Eng. Sc. and Mechanics Dept. Virginia Tech (part time)

RESEARCH AND CREATIVE ACTIVITIES

SCHOLARLY ACTIVITIES SUMMARY

Peer Reviewed Journal Publications 93 (in addition 6 abstracts appeared in journals)

Peer Reviewed Conference Proceedings and extended abstracts 223

(including refereed extended abstracts) 101 full papers + 112 extended and short abstracts

Total of >300 technical papers.

JOURNAL PAPERS

- 1) Francisco J. Londono, Abigail Swillens, Joris Van Cauwenberghe, Brett Meyers, Maheswara Reddy Koppula, Pavlos Vlachos, Julio A. Chirinos, Patrick Segers, "Assessment of Methodologies to Calculate Intraventricular Pressure Differences in Computational Models and Patients" **accepted Medical & Biological Engineering & Computing**
- 2) Bhattacharya, Sayantan, Charonko, John and Vlachos, Pavlos "Stereo-particle image velocimetry uncertainty quantification" **accepted Meas Sci Technol. Meas Sci Technol. IOP Publishing**
- 3) Jun, Brian; Giarra, Matthew; Yang, Haisheng; Main, Russell; Vlachos, Pavlos "Nanoparticle flow velocimetry with image phase correlation for confocal laser scanning microscopy" **Meas Sci Technol. Meas Sci Technol. IOP Publishing; 2016:1–11. (Journal cover)**
- 4) Bhattacharya S, Berdanier RA, Vlachos PP, Key NL. "A New Particle Image Velocimetry Technique for Turbomachinery Applications." **Journal of Turbomachinery. 2016;138(12):124501–4.**
- 5) Boomsma, Aaron; Bhattacharya, Sayantan; Troolin, Dan; Pothos, Stamatios; Vlachos, Pavlos "A comparative experimental evaluation of uncertainty estimation methods for two-component PIV" **Meas Sci Technol. IOP Publishing; 2016 Aug 1;:1–17.**
- 6) Brindise MC, Chiastra C, Burzotta F, Migliavacca F, Vlachos PP. "Hemodynamics of Stent Implantation Procedures in Coronary Bifurcations: An In Vitro Study." **Ann Biomed Eng. Springer US; 2016 Jul 26;:1–12.**
- 7) Kähler CJ, Astarita T, Vlachos PP, Sakakibara J, Hain R, Discetti S, et al. "Main results of the 4th International PIV Challenge." **Exp Fluids. 2016 May 21;:1–71.**
- 8) Iwano H, Kamimura D, Fox ER, Hall ME, Vlachos PP, Little WC. "Presence and Implication of Temporal Nonuniformity of Early Diastolic Left Ventricular Wall Expansion in Patients With Heart Failure." **J Card Fail. 2016 Apr 14.**
- 9) Rau MJ, Vlachos PP, Garimella SV. "A tomographic-PIV investigation of vapor-induced flow structures in confined jet impingement boiling." **International Journal of Multiphase Flow. Elsevier Ltd; 2016 2;84:1–12.**
- 10) Rau MJ, Guo T, Vlachos PP, Garimella SV. "Stereo-PIV measurements of vapor-induced flow modifications in confined jet impingement boiling." **International Journal of Multiphase Flow. Elsevier Ltd; 2016 1;84(C):19–33.**
- 11) Gart S, Socha JJ, Vlachos PP, Jung S. "Dogs lap using acceleration-driven open pumping." **Proceedings of the National Academy of Sciences of the United States of America. 2015 Dec 14;:201514842–5.**
- 12) Raben JS, Hariharan P, Robinson R, Malinauskas R, Vlachos PP. "Time-Resolved Particle Image Velocimetry Measurements with Wall Shear Stress and Uncertainty Quantification for the FDA Nozzle Model." **Cardiovasc Eng Tech. Springer US; 2015 Dec 1;:1–16.**
- 13) Peng Zhang, Saikat Jana, Matthew Giarra, Pavlos Vlachos, and Sunghwan Jung, "Paramecia swimming in viscous" DOI: 10.1140/epjst/e2015-50078-x **European Physical Journal**
- 14) Natalya Vorobtsova, Claudio Chiastra, Mark A. Stremmer, David C. Sane, Francesco Migliavacca, and Pavlos Vlachos, "Effects of Vessel Tortuosity on Coronary Hemodynamics: An Idealized and Patient-Specific Computational Study" DOI: 10.1007/s10439-015-1492-3 **Annals of Biomedical Engineering**

-

PATENTS INTELLECTUAL PROPERTIES AND SOFTWARE RELEASED

PATENTS

- 1) Color M-Mode Echocardiogram Propagation Velocity and Pressure Analysis Algorithm Provisional patent filed (two provisional patents (No.: 61/128,10, No.: 61/162,690)
- 2) “A Launcher for Cavitating Weapons” VTIP# 06.100- WIPO Pub. No.: WO/2008/105930 International Application No.: PCT/US2007/078504 Publication Date: 04.09.2008
- 3) (*) “A 360-degree roof membrane pressure equalizer” Development of an Omni-Directional Roof-Vent for wind hazard mitigation (VTIP 03.050). US Patent # 7,001,266.
- 4) (*) Rooftop vent for reducing pressure under a membrane roof, US Patent # 7,607,974 B2

*Now commercialized under the trade name V2T Vent™ by Acrylife
<http://sites.google.com/site/v2tventurivent/>

INTELLECTUAL PROPERTY DISCLOSURES

- 5) Passive Implant Embedded Sensing for Arterial Disease VTIP#08-112
- 6) Weapon Assisted Free Surface Penetration (WASP) VTIP#08-107
- 7) Color M-Mode Echocardiogram Propagation Velocity and Pressure Analysis Algorithm VTIP#08-099
- 8) Phase Correlation Algorithms for DPIV Estimation, VTIP#08-042 (copyright)
- 9) A Hydrodynamic Efficiency as a Diagnostic Tool for Cardiac Health VTIP#07-087
- 10) A Novel Nafion Polymer Mixer for Laminar Flows” VTIP # 06.101
- 11) “A flush-mounted wall shear sensor based on ionomeric polymers” VTIP 06.101 Provisional patent (Licensed to Discover Technologies).
- 12) “A Launcher for Cavitating Weapons” VTIP# 06.100- Provisional patent filled “A flush-mounted wall shear sensor based on ionomeric polymers” VTIP#05.082
- 13) “Rooftop Vent for Reducing Pressure Under a Membrane Roof” VTIP#05.038
- 14) “A 360-degree roof membrane pressure equalizer” Development of an Omni-Directional Roof-Vent for wind hazard mitigation (VTIP#03.050).
- 15) “Active Skin for Turbulent Drag Reduction”, Development of a novel actuator for active turbulent boundary-layer control (NASA Invention Disclosure, LAR16742-1)

SOFTWARE

- 16) **Flow Image Quantification (FlowIQ):** a comprehensive flow analysis tools for quantification of flow properties using imaging and optical diagnostics principles.
- 17) **PIV Research and Analysis (PRANA) Matlab Toolbox:** A comprehensive and state-of-the-art Particle Image Velocimetry (PIV) Matlab Toolbox, distributed as open source and aimed to support current and further research in the area of particle velocimetry. ***Over 600 downloads to date***

INVITED KEYNOTE PRESENTATIONS OR LECTURES (PARTIAL LIST)

1. The Hearts Vortices, Saint Antony Falls Laboratory, Univ. of Minnesota, Oct 2015
2. Optimization of tomographic particle image velocimetry, Office of Naval Research, Oct 2013
3. Advances in Particle Image Velocimetry, TSI Corp. Oct 2013
4. Hydrodynamics of left-ventricular filling and diastolic dysfunction, Rutgers University, April 2013
5. Hydrodynamics of left-ventricular filling and diastolic dysfunction, University of Virginia, June 2012
6. Hydrodynamics of left-ventricular filling and diastolic dysfunction, Purdue University, April 2012
7. Vortices formed at the mitral valve tips aid left ventricle filling, Mini-symposium: Cardiac Fluid Dynamics: Translating Fundamental Insights into Clinical Practice, Annual Division of Fluid Dynamics, American Physical Society, Meeting 2011.
8. Accuracy and uncertainty in velocity and wall shear stress estimation in (stented) arteries using particle image velocimetry (PIV), Food and Drug Administration (FDA), August 2011.
9. CFD / EFD Choice – A Dilemma for Industries, “Application of CFD/EFD to Bio Fluid Mechanics – Challenges” Expert Panelist, ASME IMECE 2010 Vancouver CA.
10. Mechanical Engineering Dept, Johns Hopkins University, Oct. 2010, “Hydrodynamics of Left-Ventricle Filling”.
11. Mechanical and Aerospace Engineering Dept, George Washington University, April 2010, “Cardiovascular fluid mechanics of arterial stents and left-ventricular diastolic dysfunction”.
12. Mechanical and Aerospace Engineering Dept, University of Patras, Greece, May 2009, “Quantitative Visualization, from Multiphase to Cardiovascular Flows”
13. Petroleum Institute, Abu-Dhabi, UAE, May 2009, “Robust Particle Image Velocimetry Estimation, Post Analysis and Applications for Single and Multi-Phase Flows”
14. Mechanical and Nuclear Engineering Dept. Penn State University, March 2009, “Cardiovascular fluid mechanics of arterial stents and left-ventricular diastolic dysfunction: Two cases of translational research”
15. W. M Reed Seminar University of Kentucky, April 2008, “Hemodynamics of coronary stents”
16. Abbott Vascular Advance Research and Development Feb 2008, “Hemodynamic evaluation of commercialized stent designs”
17. Keynote paper, Fluids Engineering Summer Meeting 2007, Forum on Fluid Measurement and Instrumentation, “Time-Accurate Measurement of Pressure From Particle Image Velocimetry Data”
18. Guidant Stent Design R&D Group, Jan 2006 “Cardiovascular Fluid Mechanics Measurements”
19. F. T Ogilvie Annual Lectureship Dept of Mechanical Engineering, MIT, Oct 2005 “Measuring and controlling near wall turbulence”
20. Univ. of Maryland, College Park Dept of Mechanical Engineering, September 2005 “Measuring and controlling near wall turbulence”
21. Brown University, Center of Fluid Mechanics Fall 2004 ”Measuring Near Wall Turbulence and Fluctuating Wall Shear Stresses”
22. Caltech, Workshop of Wall shear stress, Feb 2004 ”Accuracy of wall shear stress measurements using Particle Image Velocimetry”
23. Virginia Tech, School of Biomedical Engineering , Jan 2004 ”On to wall shear stress”
24. Wake Forest University, Dept of Biomedical Engineering, May 2003 ”Vortex Dynamics in the Cardiovascular System”
25. Virginia Tech, Dept of Mechanical Engineering, April 2003 ”Vortex Dynamics in the Cardiovascular System”
26. Rutgers University, Dept of Mechanical and Aerospace Engineering, Feb 2003 ”Vortex Dynamics: From Aerodynamics to Cardiovascular Hemodynamics”
27. Buffalo University (SUNY) Mechanical Engineering Dept, April 2002 “Super Spatio-Temporal Resolution Digital Particle Image Velocimetry Application to Left Ventricular Hemodynamics.”

-
28. Vanderbilt University Mechanical Engineering Dept, April 2002 “Super Spatio-Temporal Resolution Digital Particle Image Velocimetry Application To Left Ventricular Hemodynamics.”
 29. Virginia Tech Dept of Engineering Mechanics, April 2002 “Application Of Time Resolved Super Resolution Digital Particle Image Velocimetry To Cardiovascular Hemodynamics.”
 30. Alstom-Power Ltd (former ABB Swiss). Basic Research Group, Zurich, Nov.2000. “Applications Of High Speed Particle Image Velocimetry To Unsteady Vortical Flows”.
 31. 30th AIAA Fluid Dynamics Conference Invited paper, Norfolk '99 “Unsteady Separated Flows Over 3-D Slender Bodies” WITH Telionis D.P. and Zeiger M. D

PRESENTATIONS AT PROFESSIONAL MEETINGS

Over 200. Contributed prepared and/or delivered the presentation.

GRANTS AND CONTRACTS - SPONSORED RESEARCH

FUNDED RESEARCH SUMMARY:

SPONSORS:

NSF, NIH, DARPA, AFOSR, AFRL, ARO, ONR, US Navy, NASA, NIST, DOE, American Heart Association, Abbott Vascular Systems (former Guidant), Pratt and Whitney, FL Smith Minerals, Clariant, Wake Forest University, Carilion Biomedical Institute, VA Center of Innovative Technologies, Aeroprobe, Techsburg, Discover Technologies. During his career (past the PhD) Dr Vlachos has been PI or co-PI in 66 externally funded research projects.

SUMMARY OF RESEARCH FUNDING:

Funding Category	Total	Personal Portion
External	~\$17,588,789	~\$7,493,000
Internal	~\$3,070,000	~\$853,000
External (before 2003)	~\$1,546,000	~\$983,000
Total Funded Research	~\$22,215,941	~\$9,329,000

EXTERNAL FUNDING (ACTIVE)

1. Accumulation of particles and organisms in density stratified fluids with applications in algal blooms, Sponsor: NSF, PI: A.M. Ardekani, Co-PI: P. Vlachos, amount: \$435,000, Duration: 3 yrs.
2. Numerical and experimental modeling of multiphase flow through porous media for enhanced-oil-recovery applications, PI: A.M. Ardekani, Co-PI: Pavlos Vlachos, Sponsor: Pioneer Oil Company, amount \$151,899, Duration: 1 yr.
3. A 3D Co-Culture System for Examining Osteocyte-Osteoblast Interactions and Response to Physical Stimuli Sponsor: NIH-NIAMS PI: Russell Main, CoI: Pavlos Vlachos, amount: \$384,879, Duration:2 yrs.
4. Long term dynamics of water entry, PI: Sunny Jung, Sponsor: NSF, Funding amount ~\$490,000, Duration: 3 yrs.
5. How do animals harness water entry and exit dynamics, PI: Sunny Jung, Sponsor: NSF, Funding amount ~\$510,000, Duration: 3 yrs.
6. IDBR: Development of a method for three-dimensional quantitative analysis of animal flight and stability, PI: PP Vlachos, Sponsor: NSF, Funding amount ~\$600,000, Duration: 3 yrs.

-
7. “Assessment of Left Ventricle Function Using Color M-Mode Echocardiography” , PI: PP Vlachos, Sponsor: NIH, R21, Funding amount ~\$420,000, Duration:2 yrs (under no cost extension).
 8. Nanoparticle Transport as a function of Physiologic and Hyperthermic Conditions in a 3D Vascularized Microfluidic Tumor Platform, PI: Nichole Rylander, Sponsor: NIH, R21, Funding amount ~\$415,000, Duration: 2 yrs.

INTERNAL FUNDING (ACTIVE)

9. Towing Tank Renovation: DL2 Program, Funding amount ~\$2,000,000

EXTERNAL FUNDING (COMPLETED)

10. Pioneer Oil Projects, PI: Joseph Penki, Sponsor: Pioneer Oil, Funding amount ~\$600,000
11. NASA, Nicole Key (PI) An Experimental Investigation of the Flow Physics Associated with End Wall Losses and Large Rotor Tip Clearances as Found in the Rear Stages of a High Pressure Compressor* (participated only during the last 6 months of the project)
12. Novel Tumor Vascular Model for Investigating Tumor Angiogenesis and Cancer Therapies, PI: Nichole Rylander, Sponsor: NIH, R21, Funding amount ~\$355,000, Duration: 2 yrs.
13. “IGERT: Multi-Scale Transport in Environmental & Physiological Systems (MultiSTEPS)” PI: M. Stremmer et al. (coPI P. P. Vlachos, 5 PIs and 15 Senior Personnel) Sponsor: NSF, Funding amount ~\$3,000,000, Duration: 5 yrs.
14. “EFRI-BSBA Complex Microsystem Networks Inspired by Internal Insect Physiology”, PI: J. Socha et al., (coPI P. P. Vlachos, 8 coPIs), Sponsor: NSF, Funding amount: \$2,000,000 , Duration:4 yrs.
15. Development of PIV uncertainty analysis methods for the MRI facility at INL, PI: PP Vlachos, Sponsor: Idaho National Laboratory (INL), Funding amount ~\$135,000, Duration: 2 yrs.
16. (project title proprietary), PI: P P Vlachos, Sponsor: Non-disclosed, Funding amount ~\$1,115,000, Duration: 21 mo.
17. “NSF CAREER Graduate student research supplement”, PI: PP Vlachos, Sponsor: NSF, Funding amount: \$42,000, Duration: 1 yrs.
18. “CAREER: “Arterial flow dynamics: Effects of pulsatility compliance and curvature”, PI: PP Vlachos, Sponsor : NSF. Total \$400,000. Duration: 5 yrs.
19. “Flotation Modeling and Experiments” PI: R. H. Yoon, et. al. (co-PI PP Vlachos) Sponsor: FLSmith Minerals, Funding amount ~\$541,000, Duration: 12 months.
20. “Comparison of Next-Generation Commercial Stent Designs: Experimental and Computational Hemodynamic Evaluation of Stented Artery Flow Patterns” PI: PP Vlachos, Sponsor: Abbott, Funding amount ~\$30,000, Duration: 0.5 yrs.
21. “Fundamental Mechanics of Gliding Flight in Snakes” PI: Jake Socha (co-PI PP Vlachos), Sponsor: DARPA, Funding amount \$330,000, Duration: 9 months.
22. “Experimental and Computational Studies of A Water Surface Piercing Gas Jet Part-II”, PI: PP Vlachos, Sponsor: NWCDD/US Navy, Funding amount \$65,000, Duration: 0.5 yr.
23. “Computational and Experimental Studies Of A Water Surface Piercing Gas Jet, Part I” PI: PP Vlachos, Sponsor: NWCDD/US Navy, Funding amount \$196,000, Duration: 1 yr.
24. “Robust, High Sensitivity, Dynamic Wall Shear Sensors for Flow Diagnostics” Sponsor NSF, PI: PP Vlachos, Total \$250,000, Duration: 3 yrs.
25. “Magnetic Drug Targeting” PI: PP Vlachos, Sponsor: Abbott Vascular Systems, Funding amount: \$75,000, Duration: 0.5 yrs.
26. “Computational and Experimental Investigation of the EOTSG-AFW System”, PI: D Tafti & PP Vlachos, Sponsor: AREVA, CAER, Funding amount: \$160,000 Duration: 1 yrs.
27. “Flow Characterization of Hydrophobic Surface Coatings for Wall Shear-Stress Modification”, PI: PP Vlachos, Sponsor: Clariant , Funding amount: \$140,000, Duration: 1 yrs.
28. “Left Ventricle Filling hydrodynamic Efficiency as a Predictive Tool for Diagnosing Heart Diastolic Dysfunction”, PI: PP Vlachos, Sponsor: Wake Forest School of Medicine, Funding amount \$50,000 (Direct only), Duration: 1 yrs.

-
29. "Development of a comprehensive model for simulation, scale up and design of large flotation machines", PI: RH Yoon, et al. (CoPI P. P. Vlachos, 4 CoPIs), Sponsor: DOE-CAST and FL Smith Dorr Oliver, Funding amount ~\$750,000 total, Duration: 2 yrs.
 30. "Sand Particle Tracking in Ribbed Channels", PI: PP Vlachos (with K. Thole Penn State), Sponsor:Pratt & Whitney, Funding amount, \$40,000,Duration: 1 yrs.
 31. "Gas Encapsulation Methods for Payload Deployment", PI: PP Vlachos, Sponsor: DARPA, Funding amount, \$250,000, Duration: 1 yrs.
 32. "A General Theory for the Effect of Large-Scale Freestream Turbulence on Surface Heat Transfer", PI: TE Diller, PP Vlachos, Sponsor: NSF, Funding amount, \$270,000, Duration: 3 yrs.
 33. "Validation Of An Active Ionic Polymer Sensor For Dynamic Skin Friction Measurements", PI: PP Vlachos, Sponsor Office of Naval Research SBIR, Funding amount \$307,000 (Total SBIR project ~\$700,000), Duration: 3 yrs.
 34. "Validation Measurements of Metal Rubber Wall Shear Stress Sensor", PI: PP Vlachos, Sponsor: Office of Naval Research, Funding amount \$30,000, Duration: 5 months.
 35. "MRI: Development of a Spatiotemporal Velocimeter with Simultaneous Size Measurement for Polydispersed Multi-Phase Flows", PI: PP Vlachos K. Thole and C. Dancey, Sponsor: NSF: Major Research Instrumentation, Funding amount: \$394,000, Duration: 2 yrs.
 36. "Subscale studies of a water surface piercing gas jet-Phase III effort", PI: PP Vlachos, Sponsor: US Navy, Funding amount \$70,000. Duration: 0.5 yrs.
 37. "Subscale studies of a water surface piercing gas jet-Phase II effort", PI: PP Vlachos, Sponsor:US Navy, Funding amount \$99,904. Duration: 1 yrs.
 38. "Aerodynamics and flight control of circulation-control rotor disk aircraft", PI: DP Telionis P.P Vlachos and S. A Ragab, Sponsor: DARPA, Funding amount:~\$280,000, Duration: 1 yr.
 39. "Hemodynamic Evaluation of Stented Artery Flow Pattern: A Comparison of Commercialized Stent Designs", PI: PP Vlachos, Sponsor Abbott Vascular, Funding amount \$39,000, Duration: 1 yr.
 40. "Structural waveguides for aerodynamic turbulent drag reduction", PI: J Carneal, M. Johnson and P. P. Vlachos, Sponsor AFOSR, Funding amount \$40,000, Duration: 1 yr.
 41. "Effects of Leading Edge Thin Film Cooling and Surface Roughness on Downstream Film Cooling along a Transonic Turbine Blade for Low and High Free-Stream" Turbulence", PI: W Ng, K Thole and PP Vlachos, Sponsor AFOSR, Funding amount \$100,000 (\$50K + \$50k renewal), Duration: 1 yr.
 42. "Foam and Froth Analysis and Modeling.", PI: RH Yoon, , DP Telionis, PP Vlachos, Sponsor: DOE-Center of Advanced Separation Technologies, Funding amount \$504,000, Duration: 3 yrs.
 43. "Supplement I to "455118" Development and validation of computational model for flotation", PI: PP Vlachos, Sponsor: Dorr Oliver Elmco, Funding amount: ~\$25,000, Duration: 0.5 yrs.
 44. "Development and validation of computational model for flotation", PI: PP Vlachos, DP Telionis, RH Yoon, Sponsor Dorr-Oliver-CAST, Funding amount \$45,000, Duration 1 yr.
 45. "Supplement to "Development and validation of computational model for flotation", PI: PP Vlachos, Sponsor: Dorr Oliver Elmco, Funding amount: ~\$13,158 , Duration: 1 yrs .
 46. "Flow Control Over Swept, Sharp-Edged Wings": PI: DP Telionis, PP Vlachos, Sponsor: AFOSR, Funding amount: \$220,000, Duration: 3 years
 47. "Inlet Guide Vanes Flow Control", PI: PP Vlachos, Sponsor: AFOSR-SBIR w/ Techsburg, Funding amount: \$100,000, Duration: 2yr.
 48. "Flow Control and Vibration Isolation for IMP Quieting", PI: PP Vlachos, Sponsor, ONR-STTR w/ Techsburg, Funding amount: ~\$100,000, Duration: 2yr.
 49. "Addendum to: Subscale studies of a water surface piercing gas jet", PI: PP Vlachos, Sponsor: US Navy, Funding amount \$19,000, Duration: 0.5 yrs.
 50. "Subscale studies of a water surface piercing gas jet", PI: PP Vlachos, Sponsor: US Navy, Funding amount \$58,000, Duration: 1 yrs.
 51. "Testing Effect of Racetrack Air on Wake Fuel" PI: U Vandsburger and PP Vlachos, Sponsor: Pratt & Whitney, Funding amount: \$123,000, Duration: 6 mo.

-
52. “Drag Reduction Performance For A Traveling Wave”, PI: PP Vlachos, Sponsor NASA, Funding amount \$70,700, Duration: 1 yrs.
 53. “Wall Shear Stress Measurements Using Ionic Polymer Transducers”, PI: PP Vlachos, Sponsor: ONR SBIR w/ Discover Technologies LLC, Funding amount: \$33,000, Duration: 1 yr.
 54. “Testing Effect of Racetrack Air on Wake Fuel”, PI: U Vandsburger and PP Vlachos, Sponsor: Pratt & Whitney, Funding amount: \$128,000, Duration: 6 mo.
 55. “Flotation Processes/ Experiments and Analysis”, PI: DP Telionis, PP Vlachos, Sponsor: DOE-Center of Advanced Separation Technologies, Funding amount: \$190,000, Duration: 2 yrs.
 56. “Validation measurements of separated turbulent flows with active flow control”, PI: PP Vlachos, Sponsor: Aeroprobe, Funding amount: \$70,400, Duration: 8 months.
 57. “The Dependence of Particle-Bubble Oscillations on Turbulence”, PI: DP Telionis, PP Vlachos, Sponsor: DOE, Center of Advanced Separation Technologies, Funding amount: \$38,000 (direct), Duration: 1 yr.
 58. “Flow Control Over Swept, Sharp-Edged Wings”: PI: DP Telionis and PP Vlachos, Sponsor: AFOSR Funding amount: \$60,000, Duration: 1 yr.
 59. “Compliance Matching Stents for Minimum Pressure Wave Reflections”, PI: PP Vlachos, Sponsor: Carilion Biomedical Institute, Funding amount: \$23,000 (direct), Duration: 1 yr.
 60. “Quantitative In-Vitro Hemodynamic Analysis of Stented Compliant Vessels”, PI: PP Vlachos, Sponsor: American Heart Association, Wake Forest University, Funding amount: \$20,000 (direct) Duration: 1 yr
 61. “Validation measurements of separated turbulent flows with active flow control”, PI: PP Vlachos, Sponsor: Aeroprobe, CIT, Funding amount: \$45,000, Duration: 8 months.
 62. “An Omni Directional Roof Pressure Vent”, PI: J Jones, D. P. Telionis and P. P. Vlachos, Sponsor: CIT-Acrylife Inc, Funding amount: \$45,000, Duration: 6 months.
 63. “Frequency and Amplitude Independent Closed-Loop Virtual Aerodynamic Shaping”, PI: PP Vlachos and OK Rediniotis, Sponsor: AFOSR-SBIR. Phase-II, Funding amount: \$750,000, Duration: 2 yrs.
 64. “High Frequency, Time-Resolved Digital Particle Image Velocimetry System For Poly-dispersed Multi-Phase Flows”, PI: PP Vlachos (PI), Aeroprobe Corp, Sponsor: NIST, Phase-II SBIR, Funding amount: \$300,000, Duration: 2 yrs.
 65. “Active Skin for Turbulent Drag Reduction”, PI: PP Vlachos (PI) and OK Rediniotis, Sponsor: NASA, Phase-I SBIR, Total Amount: \$70,000, Duration: 6 months.
 66. “Frequency and Amplitude Independent Closed-Loop Virtual Aerodynamic Shaping”, PI: MD Zeiger, PP Vlachos and OK Rediniotis, Sponsor: AFOSR, Phase-I SBIR, Funding amount \$100,000, Duration: 9 months.
 67. “High-Frequency, Spatio-Temporal, Digital Particle Image Velocimetry System for Combustion-Induced Turbulent Flows”: PI: PP Vlachos (PI), Aeroprobe Corp., Sponsor: NIST, Phase-I SBIR. Co-Sponsor CIT, Total Amount: \$95,000, Duration: 6 months.

VIRGINIA TECH SPONSORED FUNDING (COMPLETED)

68. “ICTAS Center MBEDS (Multiscale Bio-engineered Devices and Systems)”, PI: PP Vlachos and R. Davalos, Sponsor: VT ICTAS, Funding amount: ~\$375,000, Responsibility: ~50%, Duration: 5 yrs.
69. “Microfluidic Devices Inspired by Internal Insect Physiology”, PI: J. Socha et. al., Sponsor: VT ICTAS, Funding amount: ~\$300,000, Duration: 3 yrs.
70. “ICTAS Theme Area on non Invasive Cardiovascular Diagnostics”, PI: PP Vlachos (with 6 co-PIs), Sponsor: VT ICTAS, Funding amount: ~\$250,000, Responsibility:~15%, Duration: 18 mo
71. “Spatiotemporal dynamic microfluidic measurements “, PI: PP Vlachos, Sponsor: ASPIRES Funding amount: \$90,000, Duration: 2 yrs
72. “A High Speed DPIV System For Multi-Phase Flows” PI: DP Telionis. M. Hajj, AH Nayfeh and PP Vlachos, Sponsor: ASPIRES: Funding amount: \$55,000, Duration: 6 months.

TEACHING

COURSES TAUGHT

PURDUE UNIVERSITY

Undergraduate

Fluid Mechanics (ME 309), 4 Credits:

Fall 2013, Spring 2014, Fall 2014, Spring 2015, Fall 2015, Fall 2016

Graduate (3 credit)

ME597 Experimental Fluid Mechanics, Spring 2016

VIRGINIA TECH

Undergraduate (3 credit)

Fluid Mechanics, Thermodynamics, Introduction to Thermofluids, Engineering Design, Undergraduate research.

Graduate (3 credit)

Biofluids, Fluid Mechanics, Experimental Fluid Mechanics, Advanced Methods in Experimental Fluid Mechanics, Interdisciplinary Research

COURSES DEVELOPED OR REVISED

ME309 Fluid Mechanics (Purdue)

Between Fall 2014 and Fall 2016, completely overhauled the entire experimental sequence of the class. The improvements included, development of new experiments, re-design and modernization of the experimental instrumentation, rewriting of the lab-manuals and procedures, developing new lecture recitations, grading rubrics and well structured procedures for quality control of student evaluation and feedback. In addition, the lecture component of the class was augmented with over 50 recordings of example problems.

GRAD5154: Interdisciplinary research (Virginia Tech)

Co-developed a new course for the interdisciplinary graduate education program, investigating the principles, practices, implications and limitations of interdisciplinary research. The course adopts a liberal-arts teaching model, driven by discussion, focusing on argument formation and refutation. Assignments are aimed towards the formulation of simple research objectives emanating from complex problems such as grand challenges and development of research plans and representative research proposals.

ME6984: Advanced Methods in Experimental Fluid Mechanics (Virginia Tech)

Developed a new course for the ME senior level graduate students introducing state-of-the-art tools for experimental fluid mechanics measurements. Advanced instrumentation and methods,

optical diagnostics techniques, digital signal and image processing, data analysis and presentation are addressed. The assignments within this class are primarily focused towards exposing the students to the various aspects of the research procedure through the specialization on advanced experimental methods for fluid mechanics. Namely, teaching, proposal writing, reviewing, conducting the research and continuously been evaluated by your peers as these are the intrinsic ingredients of the research enterprise. The students submit research proposals conduct insightful experiments and disseminate their results in a paper/presentation final project to their peers (class) in an attempt to simulate in the classroom the research/academia life environment.

ME5984: Experimental Fluid Mechanics (Virginia Tech)

This course is a prerequisite version of the above described course. This course was developed at a later time as it was recognized that the students lack a significant portion of the required knowledge that the advance course is attempting to provide. Therefore this course puts more emphasis on the basics and fundamentals of the most popular experimental fluids methods with sufficient background on instrumentation and signal processing. The course targets junior level graduate students and is introducing them to the basics of experimental design and experimental fluid mechanics measurements. Optical diagnostics techniques, digital signal and image processing, data analysis and presentation are emphasized. The assignments within this class are intended to be practical and very hands-on.

SBES/ME/ESM 4984/5984: Cardiovascular Fluids Mechanics (Virginia Tech)

The students taking this course will be able to define and analyze physical fluid mechanics problems involving the cardiovascular system. This will involve manipulating the full Navier Stokes equations, incorporate additional necessary constitutive relations and by performing the appropriate assumptions and posing the required initial and boundary conditions result to a tractable problem that can be modeled analytically experimentally or numerically. The course will be offered to both senior undergraduate and graduate students. The material covered will be the same. However homework assignments and project assignments will be adjusted to reflect the student's level. For graduate level students, additional homework and projects that further the in-depth analysis and synthesis capability of the student it will be required.

ME3404: Fluid Mechanics (Virginia Tech)

In the Spring of 2004 the concept of in-class demonstrations was introduced. Fluid mechanics education is often hampered by the lack of direct physical observation and intuition by the students. The "in-class demonstration" assignment aims to trigger imagination, increase student participation and interaction and provide a hands-on, fluid mechanics experience. During the in-class demo assignment the students working in groups of three are asked to design and perform a zero budget short (5-10min) demonstration of a fluid mechanics principle. The demonstration is accompanied by an electronically submitted 1 page report.

In Fall of 2006, the in class demo assignment was reintroduced in a larger section fluids class (>80 students). The success of the assignment was assessed using a survey that indicated a positive response from the students.

In Fall 2006 the use of Tablet PC's for the instruction of a large fluids section was introduced. The instruction was designed to be a combination between pre-prepared PowerPoint slides and hand writing notes on the TabletPC screen in replacement of the traditional blackboard. Interactive exercises are explored and several multimedia resources are used to enhance the learning experience. Pre and post assessment surveys suggest that this method of instruction was more effective than the traditional approaches.

QUALIFYING EXAMS

Purdue University

Fluid Mechanics and Propulsion Area exam, Spring 2014, Fall 2014, Fall 2016
Biomedical Engineering Quantitative Literature Assessment, Fall 2014

Virginia Tech

1. Mechanical Engineering Fluid Mechanics Spring '04, '06, '09 and Fall '05 '07 '08
2. School of Biomedical Engineering and Sciences '05-'11.

STUDENT EVALUATIONS OF INSTRUCTION (ONLY MAJOR COURSES):

Purdue University

Course	Term	Median Rating
ME309	Fall 2013	4.2
ME309	Spring 2014	4.4
ME309	Fall 2014	4.2
ME309	Spring 2015	4.4
ME309	Fall 2015	4.6
	Total	4.4/4.00

Solberg award citation for instruction, voted at the top 10 best instructors by the Purdue School of Mechanical Engineering undergraduate students: 2015, fall semester; 2016, spring semester

Virginia Tech

Across all years and across all major courses, graduate and undergraduate average rating = 3.8/4

COURSE DEVELOPMENT AND TEACHING EFFECTIVENESS

- Sept 15-18 2004: Participated in the ASME sponsored workshop, Excellence in Engineering Education (ExcEED) Faculty Teaching Workshop at Northeastern University September 16-18, 2004. This three-day intensive workshop (formerly called Essential Teaching Seminars) is co-sponsored by ASME, ASCE, AIChE, and IEEE. This workshop enhanced my art and craft of teaching, and increased my repertoire of techniques.
- Teaching Workshops:
 - Summer of 2006 I attended two FDI seminars, first on Mathematica and second on LabView in order to incorporate these tools in my graduate level courses.
 - Summer of 2009 I attended a series of FDI workshops for the implementation of Scholar web environment within my teaching and graduate advising practices
 - Summer of 2009 I attended a workshop for JMP statistical package in order to incorporate these tools in my graduate level courses.

-
- Fall 2006: Two instructional interventions were implemented for the ME3404 Fluid Mechanics class. The instructional impact of both attempts was assessed by an end-of-semester survey. Some representative results are shown below.
 - First, adhering with the COE's effort and desire to implement novel teaching technologies, the use of a TabletPC to replace the traditional blackboard and/or overhead transparencies or presentation slides was introduced. The ME3404 is a large section (>80 students) therefore several challenges had to be addressed for this effort to be successful. The TabletPC instruction was introduced as a hybrid teaching tool, where pre-prepared slides were used to directly write on them in order to add information, complete the slide, solve an example or explain several multimedia resources (movies/pictures).
 - Second intervention involved a formalized voluntary team assignment where the students were asked to choose a fluid mechanics principle taught during the semester and design, execute, present and report a "zero-budget" in-class demonstration. Approximately 60% of the students participated in this exercise.

Based on the results of a follow up assessment survey both attempts were successful. These two concepts will be revisited and revised and will be implemented again in future semesters.

GRADUATE RESEARCH SUPERVISION

SUMMARY OF GRADUATE STUDENT SUPERVISION:

Completed PhD:	14
Completed MS:	29
Current PhD	15
Current MS	2
Current Committee member PhD/MS	14

POST DOCTORAL FELLOWS AND RESEARCH SCIENTISTS

1. John J Charonko (Virginia Tech, 2011-2013)
2. Christopher J Weiland (Virginia Tech, 2011)
3. Michal Kotak, (Purdue University, 2014)
4. Anna Elodie Kerlo, (Purdue University, 2014-2015)

PHD DISSERTATIONS DIRECTED

VIRGINIA TECH

1. Elizabeth (Voigt) Antoine, Virginia Tech, Graduation Summer 2014, "Mechanics and transport characterization of bioengineered tissue microenvironment platforms"
2. Jaime Raben Virginia Tech, Graduation Summer 2013, "Improvements in fluidic device evaluation using particle image velocimetry"
3. Samuel Raben Virginia Tech, Graduation Summer 2013, "Determination of three-dimensional time-varying flow structures"
4. Kelley Stewart, Virginia Tech, Graduation Spring 2011, "Hydrodynamics of Cardiac Diastole"
5. David Hubble, Virginia Tech, Graduation Spring 2011, "An experimental investigation of the mechanism of heat transfer augmentation by coherent structures" (co-chaired with Prof. Thomas Diller, Mechanical Engineering Dept. Virginia Tech)

-
6. Nickolas Cardwell, Virginia Tech, Graduation Fall 2010, “Investigation of Particle Trajectories for Wall Bounded Turbulent Two-Phase Flows” (co-chaired with Prof. Karen Thole, Mechanical and Nuclear Engineering Dept. Penn State University)
 7. Chris Weiland, Virginia Tech, Graduation Spring 2010 Title: “Dynamics of the High-Speed Gas liquid Interfaces”
 8. Michael R. Brady, Virginia Tech, Graduation Fall 2009 Title: “Multiphase Hydrodynamics in Flotation Systems”
 9. Karri Satya Prakash, Virginia Tech, Graduation Fall 2009 Title: “Laminar and Transitional Flow Disturbances in Diseased and Stented Arteries”
 10. John Charonko, Virginia Tech. Graduation Spring 2009 Title: “Studies of Stented Arteries and Left Ventricular Diastolic Dysfunction Using Experimental and Clinical Analysis and Data Augmentation”
 11. Andrew Gifford, PhD Graduation Spring 2009 Title: “The Physical Mechanism of Heat Transfer Augmentation in Stagnating Flows Subject to Freestream Turbulence and Related Studies” (co-chaired with Prof. T. Diller Mechanical Engineering)
 12. Alicia Williams Virginia Tech. PhD Graduation Fall 2008 Title: “The Hydrodynamics of Ferrofluid Aggregates”
 13. Olga Pierrakos, Virginia Tech. PhD Graduation Spring 2006. Title: “Vortex Dynamics of Left Ventricular Flows”
 14. Ali Etebari, Virginia Tech. PhD Graduation Spring 2006 Title: “Wall Shear Stresses in Cardiovascular Flows”

POSITIONS HELD AND SPECIAL ACHIEVEMENTS BY ADVISEES

(First appointment post-degree, or most up to date position if known)

1. Abiven Claude,	MS	Shell
2. Brady Michael	PhD, MS	Lincoln Labs,
3. Carneal Jason	MS	Engineer NSWC Carderock Division
4. Cardwell Nick	PhD	Senior Research Scientist, Novartis
5. Charonko John	PhD, MS	Los Alamos National Laboratory

6. Cooper Daniel	MS	PhD Graduate Student, ME Virginia Tech
7. Eckstein Adric	MS	Engineer, Analyst, Mitre Corp.
8. Etebari Ali,	PhD, MS	Research engineer, NSWCCD.
9. Ewing Jerrod	MS	Engineer Siemens-Westinghouse
10. Gifford Andrew	PhD	Research engineer NSWCCD NAVY.
11. Griffiths David	MS	Research engineer, NSWCCD NAVY.
12. Hill Hugh	MS	Siemens Westinghouse
13. Holden Daniel	MS	Engineering, Roanoke
14. Hubble David	PhD	Instructor, Virginia Tech
15. Hussain Mian	MS	Boeing Seattle, WA
16. Karri Satya	PhD	Vivtro
17. Pierrakos Olga	PhD, MS	Associate Professor, James Madison University
18. Raben Sam	MS	Ford Post Doctoral Fellow, Georgia Tech
19. Steward Kelly,	PhD, MS	Research engineer NSWCCD NAVY
20. Vlachakis Vassilis	MS	PhD Graduate Student, ESM Virginia Tech
21. Antoine Elizabeth	PhD, MS	Post Doctoral Fellow, Ecole Poly. Paris.
22. Weiland Chris	PhD, MS	Research engineer NSWCCD NAVY
23. Williams Alicia ,	PhD MS	Sandia National Labs
24. Yazdani Saami,	MS	Assistant Professor, Un. Of South Alabama
25. Cassie Niebel	MS	R&D Engineering Cook Medical
26. Ben Jackson	MS	Raytheon

Special achievements of advisees

1. Elizabeth Antoine (Voigt), MS/PhD, graduate advisee 2008-present
 - a. DOD graduate student fellowship (declined)
 - b. Claire Luce Booth Graduate Fellowship
 - c. Fulbright (1 year in TUD)
 - d. ICTAS Scholar (declined)
 - e. NASA Space Grand, 2010, 2011
 - f. 2011 Paul E. Torgersen Graduate Student Research Excellence Award 1st Place MS Poster Presentations
 - g. Whitaker Foundation international post-doctoral fellowship
2. Beasley Beverly, undergraduate advisee 2002-2004,
 - a. National Science Foundation Graduate Fellowship
3. Belden Jesse undergraduate advisee 2004-2006
 - a. 1st place 2005 Virginia Tech undergraduate research symposium. Currently graduate student at ME and Ocean Engineering Dept, MIT.
4. Brady Michael, undergraduate and graduate advisee 2000-2009,
 - a. ESM Dan Pletta award for Best Senior Design 2001
5. Charonko John, undergraduate and graduate advisee 2001-2009,
 - a. 2008 Paul E. Torgersen Graduate Student Research Excellence Award 3rd Place PhD Presentations

-
- b. 1 of only 6 graduate students to represent Virginia Tech to the Commonwealth's Governor and Legislators for the annual graduate education forum.
 - c. Paul E. Torgersen Graduate Student Research Excellence Award 3rd Place MS Posters
 - d. ESM Dan Pletta award for Best Senior Design Award 2002
 - e. Graduated as top (4.0) in the College of Engineering.
6. Cooper B. Daniel
 - a. 2010 Paul E. Torgersen Graduate Student Research Excellence Award 1st Place MS Poster Presentations
 7. Drew Brady
 - a. 2011 Paul E. Torgersen Graduate Student Research Excellence Award 1st Place MS Presentations
 8. Eckstein Adric undergraduate and graduate advisee 2005-2008
 - a. 2008 Paul E. Torgersen Graduate Student Research Excellence Award 3rd Place MS Poster Presentations
 - b. Outstanding Paper in Fluid Mechanics Award, Measurement Science and Technology, 2009
 9. Etebari Ali undergraduate and graduate advisee 1999-2005
 - a. Paul E. Torgersen Graduate Student Research Excellence Award 1st Place PhD Posters
 10. Niebel Cassie, graduate advisee 2010-present,
 - a. National Science Foundation Graduate Fellowship
 - b. NASA Space Grand 2011
 11. Karri Satya Prakash graduate advisee 2005-2009
 - a. 2008 Paul E. Torgersen Graduate Student Research Excellence Award 2nd Place PhD Presentations
 12. Peter Stephen, undergraduate advisee 2007-2008
 - a. 2008 Mechanical Engineering Outstanding Scholar, David R. Shorb Memorial Honor Award.
 13. Pakdel Zhara, undergraduate advisee 2004-2005,
 - a. National Science Foundation Graduate Fellowship
 14. Pierrakos Olga, undergraduate and graduate advisee 1999-2005,
 - a. NSF CAREER Recipient
 - b. NAE Postdoctoral fellowship
 - c. Advance Fellowship (2004-2005).
 - d. Paul E. Torgersen Graduate Student Research Excellence Award 2005 2nd Place PhD Presentations
 - e. SBES 2005 Annual Grad Student Symposium
 - f. GE Fellowship (2002-2004)
 - g. P.E.O. Scholar, Idagrace Guy Endowed Scholar (2003-2004) Nominated International Award, only 10% of applicants selected
 - h. Graduate Teaching Assistant Commendation Award (2005)
 15. Raben Sam undergraduate and graduate advisee 2005-present
 - a. 2008 Paul E. Torgersen Graduate Student Research Excellence Award 2nd Place MS Poster Presentations
 - b. 1st place 2005 Virginia Tech undergraduate research symposium
 16. Stewart Kelley, graduate advisee 2006-present

-
- a. Fall 2008 Commencement Ceremony Graduate Student Speaker
 - b. 2008 Paul E. Torgersen Graduate Student Research Excellence Award 1st Place MS Poster Presentations
 - c. National Science Foundation Graduate Fellowship
17. Williams Alicia, undergraduate and graduate advisee 2004-2008
- a. National Science Foundation Graduate Fellowship
 - b. 2007 ASME Fluids Engineering Division Moody Award
18. 2008 Best Senior Design Project-Stent Design Team (7 undergraduate students)

CONFERENCE/SYMPOSIA ORGANIZATION (SELECTED)

- SES 2014, Organizing Committee and session organizer
- 4th Particle Image Velocimetry Challenge (2014) Workshop, (co-organizer)
- Inspired and co-organized the Annual Virginia Tech Fluid Mechanics symposium since 2006-2012.
- Workshop/tutorial on Particle Image Velocimetry (3 day/40 attendees), University of Maryland, May 2012
- 1st PIV uncertainty workshop: Inspired and co-organized the first PIV uncertainty workshop with international attendance (May 2011).
- Co-organized the first focused session in the DFD APS meeting 2011 on PIV uncertainty
- Co-organized the a mini-symposium on Cardiac Fluid Mechanics with clinical translational focus, at the APS DFD meeting 2011.

-
- Mini-symposium Co-organizer: Cardiac Fluid Dynamics: Translating Fundamental Insights into Clinical Practice, APS, DFD 2011
 - Symposium organizer, Measurement and Instrumentation Forum AJK Summer Meeting, Hamamatsu, Japan 2011.
 - Symposium organizer, Fundamentals and Perspectives in Fluid Mechanics AJK Summer Meeting, Hamamatsu, Japan 2011.
 - 1st PIV Uncertainty Workshop, co-organized with B. Smith (USU) and Hugh McElroy (DOE-INL).
 - Symposium on Diagnostics in Thermofluid Systems, organizer, ASME IMECE, Vancouver, Canada 2010.
 - Session chair, Measurement and Instrumentation Forum, ASME Fluids Engineering Summer Meeting, Montreal, Canada 2010.
 - Symposium organizer, Measurement and Instrumentation Forum ASME Fluids Engineering Summer Meeting, Montreal, Canada 2010.
 - Session chair, Fundamentals and Perspectives in Fluid Mechanics Symposium, ASME Fluids Engineering Summer Meeting, Montreal, Canada 2010.
 - Symposium organizer, Fundamentals and Perspectives in Fluid Mechanics ASME Fluids Engineering Summer Meeting, Montreal, Canada 2010.
 - Session chair, APS, FDD Minneapolis, MN, Nov 2009
 - Session chair, Measurement and Instrumentation Forum, ASME Fluids Engineering Summer Meeting, Veil, CO 2009.
 - Symposium organizer, Measurement and Instrumentation Forum ASME Fluids Engineering Summer Meeting, Veil, CO 2009.
 - Session chair, Fundamentals and Perspectives in Fluid Mechanics Symposium, ASME Fluids Engineering Summer Meeting, Veil, CO 2009.
 - Symposium organizer, Fundamentals and Perspectives in Fluid Mechanics ASME Fluids Engineering Summer Meeting, Veil, CO 2009.
 - Session chair, Fundamentals and Perspectives in Fluid Mechanics Symposium, ASME Fluids Engineering Summer Meeting, Jacksonville, FL 2008.
 - Symposium organizer, Fundamentals and Perspectives in Fluid Mechanics ASME Fluids Engineering Summer Meeting, Jacksonville, FL 2008.
 - Session chair, APS, FDD Salt Lake City, UT, Nov 2007
 - Session chair, Measurement and Instrumentation Forum ASME Fluids Engineering Summer Meeting, San Diego, CA 2007.
 - Session chair, Fundamentals and Perspectives in Fluid Mechanics Symposium, ASME Fluids Engineering Summer Meeting, San Diego, CA 2007.
 - Symposium organizer, Fundamentals and Perspectives in Fluid Mechanics ASME Fluids Engineering Summer Meeting, San Diego, CA 2007.
 - Symposium organizer, Fluids Engineering Summer Meeting, Miami, FL 2006.
 - Symposium organizer, Fluids Engineering Summer Meeting, Houston, TX 2005.
 - Session chair, Fluids Engineering Summer Meeting, Houston, TX 2005.
 - Session chair, Fluids Engineering Summer Meeting, Charlotte, NC, July 2004.
 - Session chair, Summer Bioengineering Meeting, Veil, CO, July 2004
